EDUCATION

University of Illinois

Master of Science in Computer Science

Chicago, IL

Aug. 2023 – Dec 2025

University of Mumbai

Bachelor of Engineering in Information Technology

Mumbai, India

Aug. 2017 – Jul. 2021

TECHNICAL SKILLS

Programming: Python | TypeScript | JavaScript | C++ | C# | Bash/Shell

Frameworks: Node.js | Vue.js | React.js | Flask | Django

AI Automation: LLM Applications | RAG | Pinecone | AI-Assisted Workflows | TensorFlow

Systems: Linux | Docker | CI/CD | Load Balancing | Microservices

Cloud Platforms: AWS | Google Cloud

Databases: PostgreSQL | MySQL | MongoDB | Redis

Testing & APIs: REST | GraphQL | PyTest | Jest | JUnit | TDD

AI Workflow Automation: LLM Applications | RAG | Pinecone | AI-Assisted Workflows | TensorFlow

EXPERIENCE

Software Research Engineer | University of Illinois

Jul 2024 – Present

- Architected and optimized data pipelines processing **500K+ PHI records**, boosting research throughput by 40%, while keeping HIPAA-compliant access and enabling secure collaboration between Stanford, UWash, and UIC.
- Engineered a cloud-backed reporting system using **Python (FastAPI/Django) and PostgreSQL**, designing REST APIs and optimized data workflows to ensure consistent daily production accuracy across institutions.
- Automated expense reporting for \$10M+ in NIH, HRSA, and DoD funding, centralizing tracking and forecasting; **reduced manual effort by 70%**, and enabled predictive budgeting to sustain future clinical trials.

Senior Software Engineer | Clevertap

Jan 2023 – Jul 2023

- Led a Vue.js dashboard revamp with API-driven pipelines and AI-enabled suggestions, cutting **campaign creation time by 50%** and driving **22% higher adoption** across enterprise clients.
- Redesigned backend services with modular dependencies, clustering, and load balancing, **optimizing query performance** and reducing latency by 80% under millions of daily events.
- Owned production issue triage during beta rollout, collaborating with product and QA to diagnose and resolve high-severity defects under tight release timelines to ensure stability of dashboard platforms.

Software Engineer | Clevertap

Jun 2021 – Dec 2022

- Designed and implemented a **reusable modular component library adopted across teams**, standardizing UI patterns and reducing duplicate code while accelerating feature delivery.
- Integrated end-to-end TestCafe automation into the CI/CD pipeline, cutting post-release defects by 70% and improving release confidence through automated regression coverage.

PROJECTS & RESEARCH

AI-Assisted Grant Management System | University of Illinois

Nov 2024 – Aug 2025

- Built a **human-in-the-loop grant workflow platform** using Node.js, PostgreSQL/MongoDB, supporting guided form completion, document collection, deadline tracking, approval routing, and submission workflows across **9 research divisions**.
- Implemented **RAG-based assistance** for grant forms, retrieving **relevant policies, requirements, and prior reference information** in context to improve form accuracy and reduce repetitive administrative support.
- Developed a **Pinecone-powered semantic knowledge layer** to index grant-related documentation and power **AI-assisted workflow support**, while preserving **HIPAA-compliant handling** of information.

GestureTips – Context-Aware VR Help System (Master's Thesis)

Jan 2024 – May 2025

- Built a **context-aware VR assistance system** in Unity/C# for Microsoft HoloLens, surfacing **object-anchored, just-in-time guidance** to improve gesture discoverability without breaking user immersion.
- Developed **multimodal, state-driven interaction logic** using **gaze, proximity, and user actions** to trigger localized help in real time, replacing static instructions with **adaptive in-flow support**.
- Designed and evaluated the system in a **24-participant user study**, reducing gesture learning effort by **30%** and informing **UX design guidelines** for immersive and gesture-based interfaces.
